

1. Go into the Settings on your Android device and select Wi-Fi.

2. Make sure your device Wi-Fi is turned on and tap the “LMU-Wireless” network.

3. Make sure EAP method is set to PEAP, Phase 2 authentication is set to none, and the CA certificate is set to (Unspecified). Use your username in the “Identity” field, and your password in the “Enter password” field. Leave the “Anonymous identity” field blank.

4. If prompted, accept the “boreas.lmu.edu” certificate.
5. “LMU-Wireless” should turn blue and show that you’re connected.
