The following instructions will help you delete Gmail from your native (built-in) Android email app and add your new LMU or Loyola Law School Outlook account.

NOTE: Android's built-in mail app may look different on different devices, and these directions may not exactly match the options you see.

1. Delete existing LMU or LLS Gmail account
2. Open Email app > tap Settings > Add Account
3. Select Microsoft Exchange ActiveSync
4. Enter your LMU or LLS email address - firstname.lastname@lmu.edu or firstname.lastname@lls.edu. If this fails, try username@lmu.edu or username@lls.edu
5. Enter your password
6. Tap Next
7. Select Microsoft Exchange Active Sync
8. Tap Yes or Okay to confirm settings
9. Select Sync Settings > Next
10. Tap Done

NOTE: If you have an issue with Authentication failure when adding your account, try using the following settings:

- Email address: first.last@lmu.edu or first.last@lls.edu
- Domain\Username: first.last@lmu.edu or first.last@lls.edu
- Server: outlook.office365.com
- Ensure SSL is checked.
