

We have upgraded our VPN concentrator and therefore, we have updated our instructions to reflect the multiple operating systems that our VPN connection can now support.

MAC OS X

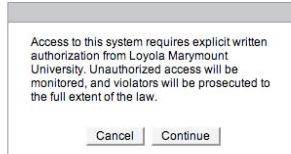

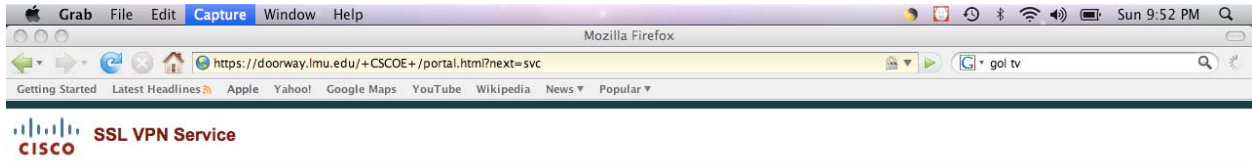

Using the web browser:

Direct your web page to <https://doorway.lmu.edu>

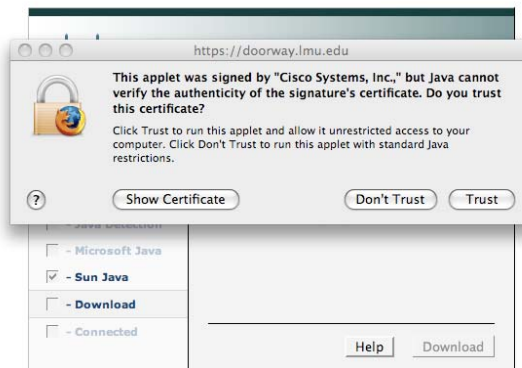

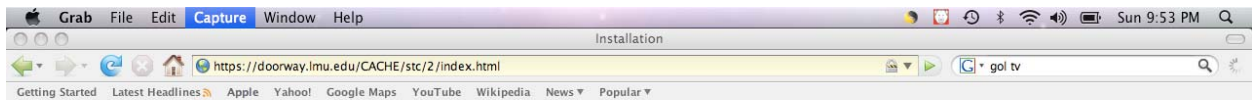

You will be directed to a login page and get a screen similar to this:

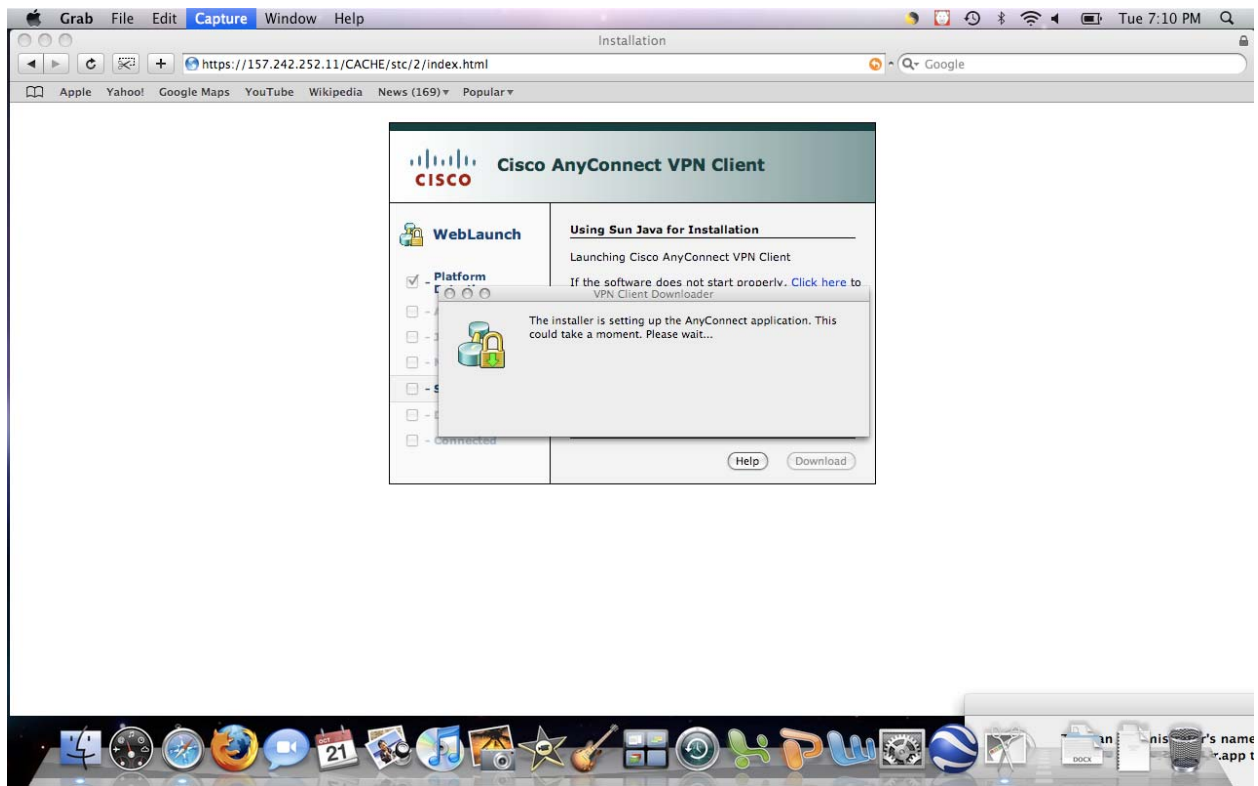

Log in with your credentials and click continue:

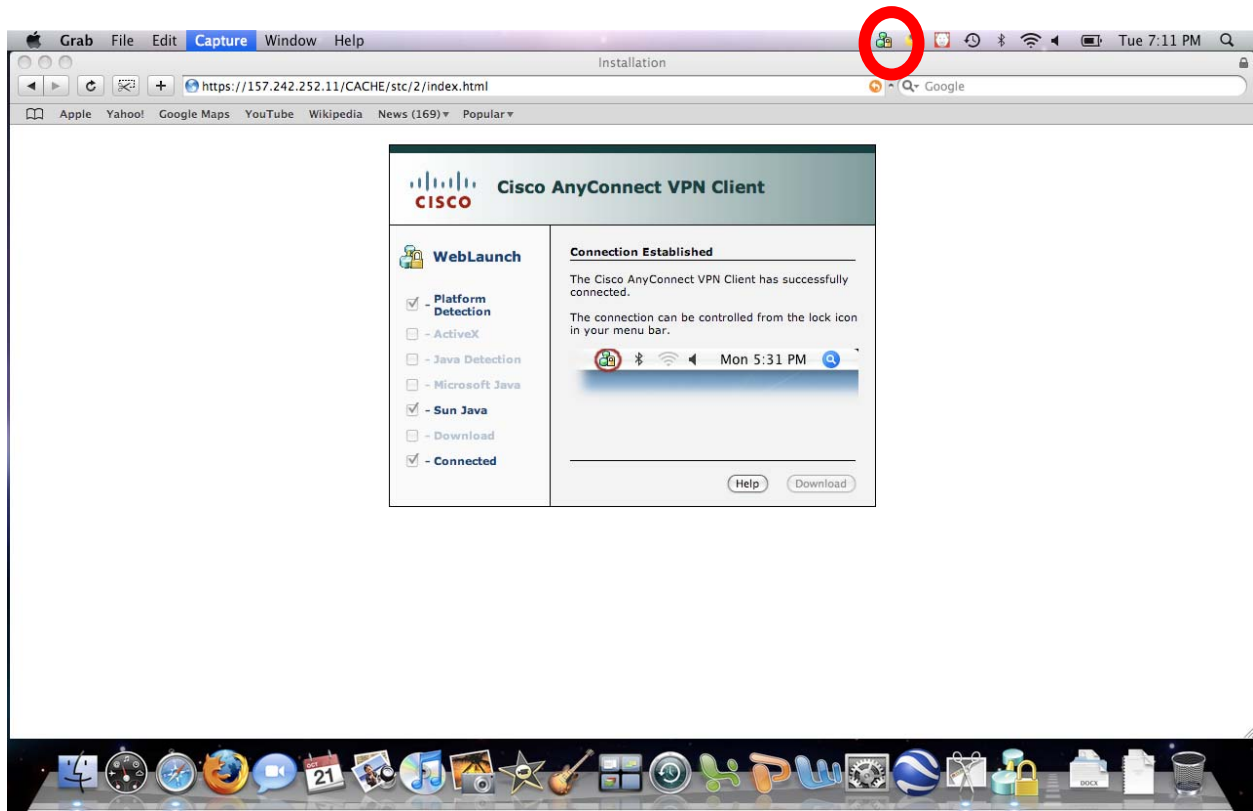

You will now come to a webpage that will scan your computer to find the correct VPN client to install. If you receive the following page please click "trust" on this certificate:

When the scan is complete, the web server will have automatically installed the VPN client for you and you will get an installation successful page shown below. If you are asked to verify the installation of scripts, please allow the installation.

When you receive this message, you should have a new icon upper right corner. This icon indicates that you are connected to the VPN.

To disconnect from the VPN, simply right click on the icon and select disconnect.
